PROBLEM STATEMENT:

Internship Course Exemption Portal

DESCRIPTION:

90 days (3 months) internship course exemption

PROJECT FLOW:

The Internship Exemption Portal is a digital platform designed to simplify the process of obtaining exemptions for internship courses within academic institutions. The portal provides a seamless interface for both students and administrators, allowing for efficient review and approval of exemption requests.

Key Features:

User-Friendly Interface: The portal boasts an intuitive user interface that guides students through the exemption request process step by step. Clear instructions and prompts ensure that students provide all necessary information and documentation.

Automated Verification: Integrated with academic databases and systems, the portal automates the verification of student records and eligibility criteria. This reduces the administrative burden on staff and accelerates the review process.

Document Management: Students can upload all required documents directly to the portal, including transcripts, resumes, and any relevant certifications or work experience. Administrators can easily access and review these documents within the platform.

Customized Review Workflows: The portal supports customizable review workflows, allowing academic departments to define specific criteria for exemption eligibility and designate appropriate reviewers. This ensures consistency and fairness in the evaluation process.

Real-Time Status Updates: Throughout the review process, students receive real-time updates on the status of their exemption request, including notifications for any additional documentation needed or decisions made by reviewers.

Communication Tools: Built-in communication tools facilitate seamless correspondence between students and administrators regarding their exemption requests. Students can ask questions, provide additional information, or receive guidance directly through the portal.

Analytics and Reporting: The portal generates comprehensive analytics and reports for administrators, offering insights into exemption request trends, approval rates, and areas for improvement. This data-driven approach enables institutions to optimize their exemption processes over time.

Internship Course Exemption-MERN

Login-Student/Admin

Student/Admin can sign in using their bitsathy google account.

Student Dashboard

After the successful sign-in of students, they will be directed to the dashboard displaying Profile and their submitted requests and their status

Exemption Request

If they want to submit a request, they will be directed to fill out the form

Admin Panel
